

Guide to obtaining Merchandise Trade Data from SingStat Table Builder (STB)

Topline Statistics: Scroll to the last page of the Media Release and click the link to ‘*Merchandise Trade by Commodity Section (At Current Prices)*’ <https://tablebuilder.singstat.gov.sg/table/TS/M451001>

The dataset defaults to monthly figures. This video guide shows how to generate annual year-on-year (%) change for non-oil domestic exports (NODX). Click the image below to access the video on YouTube, and refer to next slide for a written guide.

TOPLINE TRADE STATISTICS: NODX YEAR-ON-YEAR WALKTHROUGH

Step 1: Open the Table Builder

↳ <https://tablebuilder.singstat.gov.sg/table/TS/M451001>

Step 2: Select the Data Series (Optional)

- ↳ Unselect all existing data series.
- ↳ Search for and select a data series.
- ↳ Click **Update Table** to apply the selection.

Step 3: Convert Data to Required Frequency

- ↳ Click **Compute**.
- ↳ Select **Convert to annual** or **Convert to quarterly**.

Step 4: Calculate Year-on-Year Growth

- ↳ Click **Compute** again.
- ↳ Select **Percentage Change → Year on Year**.

Step 5: Review Results

- ↳ The table will display the results.

Granular Trade Statistics: Refer to the new table on ‘*Merchandise Trade Value by Commodity and Market*’ <https://tablebuilder.singstat.gov.sg/table/TR/T010001>

This video guide shows how to obtain more granular trade statistics, broken down by commodity (up to HS8) and market. Click the image below to access the video on YouTube, and refer to next slide for a written guide.

The screenshot displays the SingStat Table Builder interface. On the left, there is a navigation sidebar with three main categories: 'Economy & Prices' (expanded), 'Industry', and 'Trade & Investment'. The 'Economy & Prices' category includes sub-items like National Accounts, Balance of Payments, International Investment Position, External Debt, Household Sector Balance Sheet, Labour, Prices, and Public Finance. The 'Industry' category includes Formation and Cessation of Business Entities, Enterprises, Corporate Sector, Business Expectations, Services, Manufacturing, Building, InfoComm, Finance, R&D, Tourism, and Transport. The 'Trade & Investment' category is currently collapsed, showing only 'Direct Investment Abroad (DIA)'. Below this is a smiley face icon.

The main content area shows the breadcrumb trail: Trade & Investment > Merchandise Trade > Merchandise Trade by Commodity and Market > Merchandise Trade Value by Commodity and Market. A 'Table tutorial' link is visible. The title of the table is 'Merchandise Trade Value by Commodity and Market'. Below the title, it states 'Data Last Updated: 05 Feb 2026' and 'Source: ENTERPRISE SINGAPORE', with a 'Hide metadata' link. A section for 'Select data series and time period to view the data.' contains a 'Data Series & Time Period' label and an 'Indicate Selection' button with a dropdown arrow.

On the right side, there is a 'Metadata' panel. It includes a 'Definitions and Footnotes' section stating that data are based on the ASEAN Harmonised Tariff Nomenclature (AHTN) 2022 version and that functions are in beta. It also defines 'Domestic Exports' as exports of Singapore origin, including primary commodities and goods transformed in Singapore. A 'Notation' section lists codes like 'na', 'nec', 'nes', and '-' with their meanings. A 'Notes' section mentions that numbers may not add up to totals due to rounding, with a 'Show more' link. At the bottom, the 'Unit' is specified as 'Thousand Dollars'. A small circular icon with a person's face is located at the bottom right of the metadata panel.

TRADE STATISTICS BY PRODUCT AND MARKET WALKTHROUGH

Step 1: Open the Table Builder

↳ <https://tablebuilder.singstat.gov.sg/table/TR/T010001>

Step 2: Open the Filters

↳ Click the **filter icon** to begin customising the table.

Step 3: Select Products

↳ Expand from **HS2 down to HS8** for the most detailed product-level data.

↳ You may use the **search bar** to find a specific item.

Step 4: Select Market and Trade Type

↳ Select market of interest.

↳ Select trade type (e.g. Domestic Exports).

↳ Click **Continue** to proceed.

Step 5: Review Results

↳ The table will be displayed and sorted by time period, with the latest data shown first.

(Optional): Export the Data

↳ Click **Export** to download the results as a CSV file
